Sam Glenn's insights on personal and professional development are gleaned from his own life experiences of successes and failures. Sam, at one time, operated a business in a multi-billion dollar international industry that was lost overnight in a fire. Riddled with depression and doubt, Sam found himself in unfamiliar territory. As he puts it, "It was the land of failure and frustration." Sam got by sleeping on borrowed floor space, working nights as a janitor and delivering newspapers. Faced with much criticism and confusion on what to do next, it was an experience that changed the course of direction for Sam Glenn. It

was what he fondly refers to today as "A Kick in the Attitude!"

Through small changes to his outlook and lifestyle, Sam developed the courage to dream a new dream for his life and try again. Sam became convicted with the knowledge that meaningful choices create a meaningful life and when our attitude changes, our world will change.

Today, Sam operates a highly successful speaking business and has authored 16 incredible books on attitude, character, overcoming failure and more. Through it all, he has inspired millions with his simple, heartfelt stories, impacting people to make huge changes with small choices. Sam also believes humor is a powerful asset to deal with life's adversities. With insight and outrageous humor-filled stories, Sam leaves his audience in stitches, while delicately weaving a powerful message of principles.

*"We all can find meaning, purpose and opportunity in our failures and adversities. And that's really what I do, help people touch their potential, overcome fears and show them the power of their best attitude in action." - Sam Glenn*
